

# Catalacs have Winning Ways with Wives

CATALACS REMAIN THE BEST SELLING CRUISING CATAMARANS IN THE WORLD... BY A LONG WAY! They are such successful craft that their qualities are well known, safe, stable, beautifully moulded by skilled laminators, finished to a high standard by enthusiastic staff, fully equipped, ready to go, and backed with a 5 year guarantee.

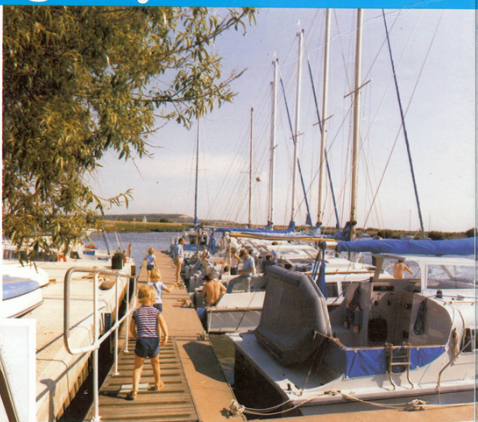

Tom Lack Catamarans Ltd., build them, make their own patterns and moulds, then process them to completion. Launched and commissioned from their waterside Yard at Christchurch, they are then test-sailed before being handed to their delighted owners.

Catalacs have an enviable record, very comfortable accommodation, sailing without heeling and virtually maintenance-free characteristics. Over the years Catalacs have given so much pleasure to their owners that a very strong Class Association has developed, providing Rallies, races and get-togethers and, equally important, very modest Insurance rates.

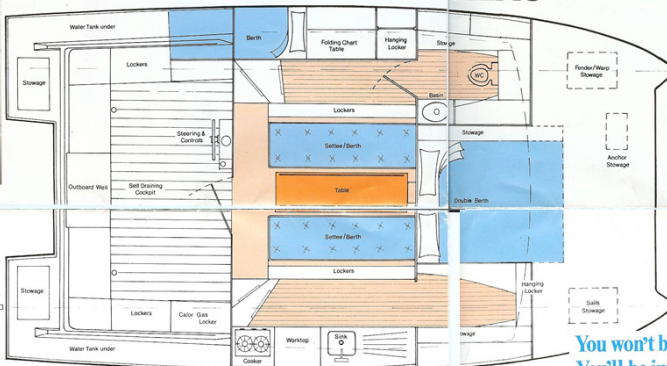

Built to technical specifications superior to Lloyds, the Catalac fleet provides its families with trouble-free ownership and even the most sceptical monohull owner tends to moderate his criticisms.

Read what others have to say about us; talk to the owners; discuss any aspect of the Catalac's construction and performance with our Staff; even have a test sail - We are confident that you will wonder why you have taken so long to choose a Catalac!

Your move!
